PREFACE

This volume is the third in the Society for California Archaeology's series, designed to disseminate information presented at the Annual Meetings. At the end of the volume the reader will find a revised Style Guide. Please note that the revisions in the guide are not reflected in this volume, which used the version published in volume 1. Future volumes of the Proceedings will, however, stringently adhere to the guidelines as presented in the revised guide.

The editors would like to thank the SCA Executive Board for their continued support, and for approving the increase in dues, which insures that this publication will continue on into the 1990s. The membership at large has been incredibly supportive, and it is worth noting that the SCA Board only received one negative response to the dues increase.

For those of you who may not know, this series was primarily the brain-child of Dr. Susan M. Hector. She considered the main goal of her tenure as president of the SCA to be the implementation of the publication you now hold in your hands. As senior editor for volumes 1 and 2 she could hardly tout her own accomplishments, but since she no longer serves on the editorial committee, I think it is appropriate now for the Society to offer her our most heartfelt thanks and congratulations for getting this thing off the ground. Unfortunately, Dr. Hector is no longer working in the profession. California archaeology will suffer from the loss of her dedication and her deep concern for the resources of this State. As my wife, however, I am fortunate to have her available to answer my questions and inquiries as the editors try to fill the void felt by her departure. Thank you.
