## STATEMENT OF PURPOSE

The Proceedings was established by the Society for California Archaeology in 1988 to promote public dissemination of recent archaeological investigations in California. The Proceedings provides a publication outlet for the papers presented at the SCA Annual Meetings. All papers presented at the Annual Meeting are eligible for publication. The Proceedings is published annually, thus insuring prompt publication and dissemination of research results and commentary relating to California archaeology. Individual papers are published as received, without formal peer review, except as required by the Proceedings editor to insure conformance with the established style requirements.

## INFORMATION FOR CONTRIBUTORS

Authors should prepare their manuscript in accordance with the Proceedings style guide, published in Volume 3. Authors should submit their manuscript in both hard copy and on computer diskette. The Proceedings will not publish information that has appeared in the Society's Newsletter. The deadline for submission of manuscripts is July 1st, following the Annual Meeting. Manuscripts should be submitted to the Proceedings editor at the address listed in the SCA Newsletter.
